

# WebGME and META tools integration status

05/22/2014

Zsolt Lattmann

# Motivation (why?)

- Live collaboration
- Model versioning
- Persistent history
- Reduce user interface complexity
- Increase productivity
- Seamless domain specific tool integration

# Approach (how?)

- Web based technologies
- Database stores model along with its revisions and history
- Customizable user interface allows to enable and disable various features
- Projections of data model
- Provide extension points
